

## Erratum

# Distinct Roles for the Actin Nucleators Arp2/3 and hDia1 during NK-Mediated Cytotoxicity

Boyd Butler\* and John A. Cooper

(Current Biology 19, 1886–1896; December 1, 2009)

In this paper, as a result of an author error, Figure 2 contained errors in the images representing wild-type (WT) cells on fibronectin for Arp2/3 colocalization with actin (C, top row) and for VLA-4 colocalization with actin (D, middle row). The authors have repeated the experiments for both panels, and the corrected version appears here. The corrected panels do not alter the results or conclusions of the paper.

Also as a result of an author error, Figure S5 contained identical bands for controls in whole-cell sonicate (WCS) actin for Arp2/3 KD (D) and total whole-cell lysate (WCL) for Rac1 (E). The authors have repeated the relevant experiments for both panels, and the corrected version appears here. The corrected panels do not alter the results or conclusions of the paper.

The authors regret these errors.
